What Makes a Product ENERGY STAR Certified?

To sum it up, ENERGY STAR certified products have the same or better performance than standard products, only they use less energy. To earn the ENERGY STAR certification, products must meet strict energy efficiency criteria set by the U.S. Environmental Protection Agency or the U.S. Department of Energy. Since these products use less energy, they save you money on your energy bill while helping protect the environment by causing fewer harmful emissions. Plus, you get the features and quality you expect from products and appliances you pay for.
